

TORC Oil & Gas Ltd. is a public, intermediate, light oil focused company with a proven track record of creating significant value through an acquisition/exploitation/exploration strategy focused on light oil resource plays. Since inception in December 2010, the TORC Team has been successfully developing high quality light oil assets in southeast Saskatchewan and the central Alberta Cardium resource play, both being areas where the TORC team has an established track record. TORC's experienced management team is leading an exciting strategy of providing disciplined per share growth while paying a sustainable dividend to shareholders. The Company's success is attributed to our team of skilled and dedicated employees and consultants working together to achieve TORC's goals.

Due to its continued growth, TORC is seeking an Exploitation Engineer whose main responsibilities will include:

- Recommendation and implementation of area development plans to achieve the company's reserves and production growth targets
- Identification and development of exploitation opportunities and optimal reservoir depletion strategies
- Focusing on increasing recovery factors through infill drilling, water flood optimization and improved technology
- Management of the annual company reserve reporting process for areas of responsibility
- Working closely with field staff to optimize existing production

The ideal candidate will possess the following skills and qualities:

- University Degree in Engineering, APEGA membership and Professional Engineer status is required
- 5-10 years of progressive production and exploitation engineering experience
- Enthusiasm to contribute as a member of a technical team primarily responsible for reserves and production growth
- Self-starter with excellent time management skills and the desire to work in a dynamic team environment
- Excellent communication skills and ability to develop working relationships with corporate and field staff
- Excellent computer skills with proficiency in well performance analysis, production forecasting, economic evaluations, Microsoft Office applications and Accumap
- Proficiency with Mosaic and PVR would be considered an asset
